

Happy 31st Birthday, Dominica

Adapted from an Article written by Chris in Ramblings <http://www.dominica-weekly.com/tag/independence-celebrations/>

Happy 31st Independence Dominica!!

Thirty-one years as an independent nation may be considered as insignificant in the life of any nation but by this period we should have developed a basic concept as to the general direction in which we want to go as an island nation. The country needs to ask if we have made the best use of political self-governance or whether we have squandered it.

If we are to survive the next 31 years and beyond, our leaders must create a more vibrant economy and we need to take advantage of the unique natural features of our island. These natural endowments are in great demand worldwide and we need to develop with cost effective ways to market these unique features.

Dominica is one of the most naturally beautiful and peaceful countries in the world and our people enjoy an enviable quality of life.

We would like to extend Happy 31st Independence Greetings and Best Wishes to all Dominicans everywhere and Give Thanks to the Almighty for the blessings He has bestowed upon our Land.
